

# DOWNLOAD PAGECENTER PLUG-IN INSTRUCTIONS

The Download PageCenter Plug-in Instructions are designed to explain the steps you should take to download plug-ins that will enable PageCenter web access for saving and printing documents. Up-to-date plug-ins are required for functionality when working with **AFP** Pageset types (e.g., EFT letters, renewal applications, etc.). PageCenter users that do not utilize plug-in functionality may not have some options provided by plug-ins (e.g., fit to width, form feed, carriage control, etc.) but will still be able to print and save documents.

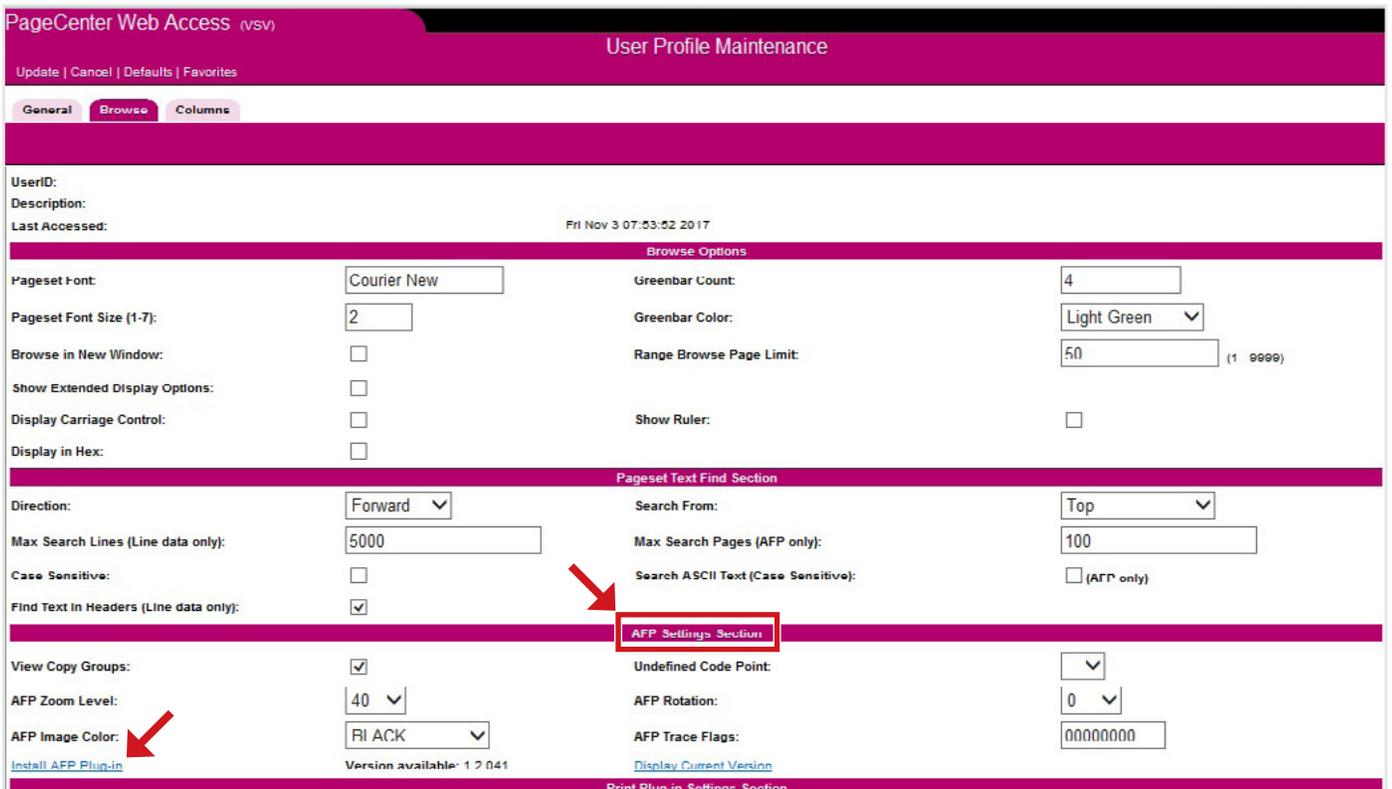

1. Click on “Preferences” from the Main Options menu.

2. Select the “Browse” tab.

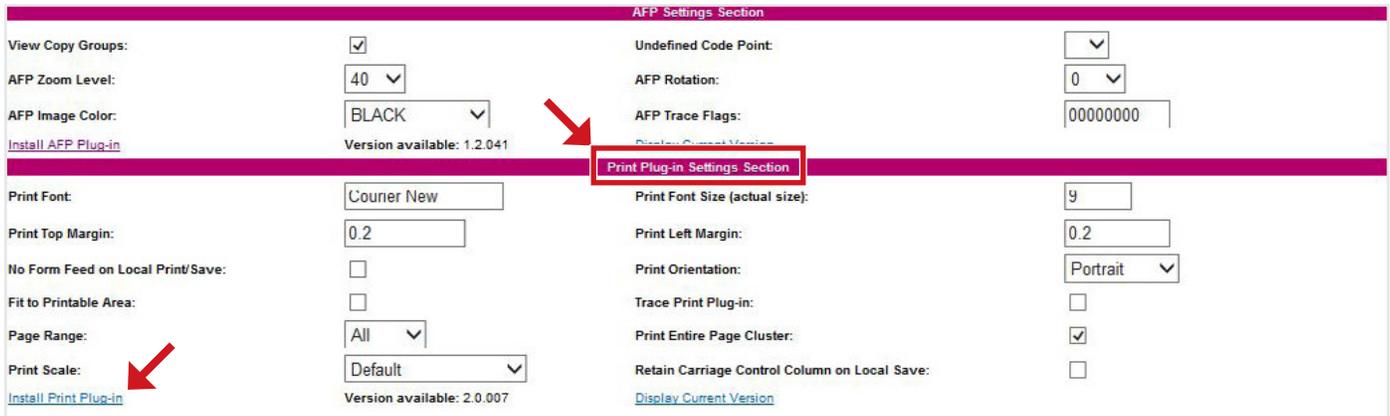

3. Go to the AFP Settings Section; click on “Install AFP Plug-in.”

4. Click “Save” to save the plug-in to the folder of your choice.

5. Scroll down to the Print Plug-in Settings Section; click “Install Print Plug-in.”

6. Click “Save” to save the plug-in to the folder of your choice.

7. Go to the location where the plug-ins are saved:
- First, click on the box labeled “afpplug” and follow the InstallShield Wizard steps.
  - Next, click on the box labeled “pcwaplug” and follow the InstallShield Wizard steps.
  - Log out of PageCenter and close the internet browser.
  - Reopen your internet browser and log back in to PageCenter.

If you need additional assistance with PageCenter, please contact State Grant and Special Programs staff at 1.800.443.0646.
